## **Mystic Pharmaceuticals Receives U.S. Patent for Human-Centric Unit Dose Drug Packaging and Delivery Technology**

*Pharmaceutical packaging is a \$90B industry growing at 6.4% annually according to the World Pharmaceutical Packaging study published by Fredonia Group*

**AUSTIN, TX – April 8, 2014** -- [Mystic Pharmaceuticals](http://www.mysticpharmaceuticals.com), Inc., a privately held integrated specialty pharmaceutical company, announced today it has been granted U.S. Patent 8,683,995 “Dose Dispensing Containers” for its latest innovations in pharmaceutical packaging and dispensers. Mystic’s recent technological advances provide pharmaceutical and biotech companies with a cost effective means to combine the benefits of “unit of use” packaging with precision dose dispensing of drugs or biologics in liquid or powder form. This technology further advances the company’s VersiDoser® and VRx2™ delivery platforms enabling the development of human-centric drug/device combination products.

“Unit of use packaging is one of the fastest growing segments of the overall pharmaceutical packaging industry providing pharma companies and consumers with many benefits. Precise dosing, sterility assurance, tamper-resistant design and convenience for the consumer are some of the advantages driving the growth of this segment of the industry”, said Mystic’s President and CEO, Timothy Sullivan. Mystic’s latest technological advances further expand the application of unit dose packaging into new diverse areas including nasal vaccines and therapeutics for treating Central Nervous System and neurodegenerative disorders such as Alzheimer’s, Parkinson’s and traumatic brain injury.

Mystic’s delivery systems improve patient adherence and health outcomes by simplifying self-administration, patient convenience and non-invasive delivery of drugs or biologics. For pharmaceutical companies, developing human-centric combination products provides the patient with a superior product experience and can extend or establish market exclusivity and competitive differentiation for new or existing drug products. Mystic’s VersiDoser® and VRx2™ platforms provide pharmaceutical companies with optimized unit dose packaging and custom delivery systems for ophthalmic, systemic nasal, nose to brain, sublingual and dermal product applications.

### **About Mystic Pharmaceuticals, Inc.**

Mystic Pharmaceuticals® is an integrated specialty pharmaceutical company based in Austin, Texas. Mystic provides patient-centric delivery solutions for pharmaceuticals and biologics for intranasal, ophthalmic, sublingual, and otic applications. Mystic combines its novel delivery systems with pharmaceuticals and biologics under development by Mystic and its partners, to meet the expanding global market demand for healthcare products that are safer, simpler to use and cost effective.
