Mystic Pharmaceuticals Receives U.S. Patent for Manufacturing Innovative Unit Dose Packaging for Drugs and Biologics

AUSTIN, TX – September 12, 2012 -- Mystic Pharmaceuticals, Inc. announces today that it has been granted U.S. Patent No. 8,272,194, "Deep Draw Container Forming Method" a novel manufacturing process for unit dose blister packaging technology. This packaging technology is a key element of the company's VersiDoser® and VRx2™ drug and biologic delivery systems. Mystic's delivery technology provides sterile unit dose packaging and patient focused drug delivery systems for ophthalmic and systemic nasal applications.

President and CEO of Mystic, Timothy Sullivan states that, "this latest patent further expands our IP portfolio in the critical area of manufacturing our novel unit dose blister packaging for drugs and biologics. Our manufacturing process and novel unit dose blisters provide pharma manufacturers with cost competitive options for aseptic fill or terminally sterilized products for either liquids or powders. With Mystic's VersiDoser™ and VRx2™ delivery systems patients can precisely self-administer medications to the eye, nose, mouth, ear or topically to the skin."

Combining drugs with patient focused delivery devices provides the patient a superior experience in ease of use, convenience and therapeutic results. Drug delivery enhanced products that provide improved benefits to the consumer and extend or establish market exclusivity and competitive differentiation has emerged as a compelling product strategy for big pharma, specialty pharma and biotech manufacturers. Mystic delivery systems are designed to meet the diverse demands of manufacturers and consumers in a globally competitive market.

About Mystic Pharmaceuticals, Inc.

Mystic Pharmaceuticals™ is an integrated specialty pharmaceutical company based in Austin, Texas. Mystic provides precision unit dose delivery solutions for pharmaceuticals, biopharmaceuticals and biologics for intranasal, ophthalmic, sublingual, and otic applications. Mystic combines its novel delivery systems with pharmaceuticals and biologics under development by Mystic and its partners, to meet the expanding global market demand for healthcare products that are safer, simpler to use and cost effective.
