Mystic Pharmaceuticals to Present at 4th Ocular Diseases & Drug Discovery Conference

AUSTIN, TX – 12 January 2012 – Mystic Pharmaceuticals, Inc. announced today that President and CEO Timothy Sullivan will present at the 4th Ocular Diseases and Drug Delivery Conference in Las Vegas, Nevada on February 27 – 28, 2012. This annual conference brings together thought leaders and innovators in ocular diseases, drug development and drug delivery to collaborate on the latest research and discovery for combating and curing age-related macular degeneration (AMD), diabetic retinopathy, glaucoma, uveitis and other eye diseases. Leading researchers from academia and the pharma industry including Allergan, Genzyme, Pfizer and others will present the latest advances in ophthalmic drug discovery, development and delivery.

Timothy Sullivan will present on the topic of “Novel Advances in Ophthalmic Drug Delivery, Adherence Packaging and Improving the Patient Experience” on February 27th. Mr. Sullivan’s presentation will provide a technical overview of Mystic’s VersiDoser® Delivery Platform including patient acceptance data from a recent clinical trial for macular degeneration. The VersiDoser® Delivery Platform provides patients the capability to reliably and easily self-administer ophthalmic treatments. “More than 75% of the patients participating in this clinical trial preferred the VersiDoser® Delivery System over traditional eye drop delivery. These results correlate to earlier focus group studies we have conducted,” stated Mr. Sullivan. “In addition to enhancing the patient experience the VersiDoser® Platform provides pharma manufacturers with the option for preservative free formulations, high efficiency packaging enabling the same number of doses with up to 70% less bulk drug volume, and a means of establishing competitive market differentiation for existing drugs coming off patent or new pipeline biopharmaceuticals,” added Sullivan.

About Mystic Pharmaceuticals, Inc.

Mystic Pharmaceuticals™ is an integrated specialty pharmaceutical company based in Austin, Texas. Mystic provides precision unit dose delivery solutions for pharmaceuticals, biopharmaceuticals and vaccines for intranasal, ophthalmic, sublingual, and otic applications. Mystic combines its novel delivery systems with pharmaceuticals and biologics under development by Mystic and its partners, to meet the expanding global market demand for healthcare products that are safer, simpler to use and cost effective.
